Student Visa | Eligible for Werkstudent employment

PROFILE SNAPSHOT

Front-End Developer with 3+ years of experience building scalable and responsive web applications using Vue.js and React.js. Currently pursuing an MSc in Natural Language Processing at the University of Trier. Experienced in frontend engineering, CMS integration, API development, and AI-powered applications, including Retrieval-Augmented Generation (RAG) systems using vector databases and Large Language Models. Available immediately for Werkstudent opportunities.

TECHNICAL SKILLS

- Frontend: Vue.js, React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Sass, Vuetify, Bootstrap
- Backend & APIs: FastAPI, REST APIs, Python, SQL
- CMS & Tools: VTEX, Flash CMS, Git, GitHub, GitLab, Storybook
- AI / NLP: Retrieval-Augmented Generation (RAG), ChromaDB, Vector Databases, Sentence Transformers, Hugging Face Inference API, Embeddings, Semantic Search, Prompt Engineering

PROFESSIONAL EXPERIENCE

Front-End Developer | Motorola Mobility (a Lenovo company) - Contract with Digital minds |

Jul 2024 – Mar 2026

- Crafted 15+ reusable Vue.js and Sass components, boosting code modularity and reuse by 40%
- Integrated over 20 React modules into the VTEX platform, accelerating page load times by 15% and enhancing e-commerce conversion rates
- Elevated web accessibility score from 70% to 92% through meticulous audits and optimizations using Lighthouse
- Troubleshooted and resolved 100+ UI issues via browser developer tools and QA feedback, enhancing interface stability by 60%
- Partnered on CMS projects, facilitating seamless migration from VTEX to Flash CMS across 5+ portals without downtime
- Developed and deployed backend automation workflows using Python and Fast API, leveraging AI-assisted development tools to streamline implementation and debugging.
- Collaborated on automation projects involving Fast API services and Python-based backend workflows to improve operational efficiency.
- Translated complex Figma UI designs into fully responsive, pixel-perfect Vue.js components, ensuring consistent UX across devices

Web Developer | Lenovo India Pvt. Ltd. | January 2023 – July 2024

- Delivered 15+ front-end features for 8 successful product launches.
- Managed CMS updates, expanding digital assets by 20% and increasing page views by 15%.
- Developed SPAs using Vue.js and Vuetify, cutting code complexity by 30%.
- Implemented responsive designs, boosting mobile session duration by 25%.

EDUCATION

- **MSc in Natural Language Processing** | University of Trier, Germany | 2026–Present
- **Bachelor's of Engineering in Computer Science** | Shreedevi Institute of Technology, India | 2018–2022

PROJECTS

- **AI Document Assistant (RAG Application) | 2026**
 - Built and deployed a Retrieval-Augmented Generation (RAG) application using Python, Streamlit, ChromaDB, Sentence Transformers, and Hugging Face LLMs.
 - Implemented PDF document ingestion, text extraction, semantic chunking, embedding generation, and vector similarity search.
 - Utilized BAAI/bge-small-en-v1.5 embeddings and ChromaDB for semantic retrieval of relevant document context.
 - Integrated Large Language Models to generate context-aware answers based on retrieved document content.GitHub: github.com/kichu06/rag-document-assistant
Live Demo: <https://rag-document-assistant-twnpiyqkcbmqvqynh2nopb.streamlit.app/>

- **Responsive Menu Cart**

Built a responsive e-commerce shopping cart with dynamic product rendering using Vue.js, JavaScript, and Sass.

URL: <https://kichu06.github.io/responsive-menu-cart/>

- **Responsive Landing Page**

Developed a responsive landing page optimized for multiple screen sizes using Vue.js, HTML, CSS, and Sass.
