

Dear Hiring Team,

I am writing to express my interest in working student or part-time opportunities in frontend/software development at your company.

I am currently pursuing my MSc in Natural Language Processing at the University of Trier and have professional experience as a Front-End Developer working with modern web technologies such as Vue.js, React.js, JavaScript, TypeScript, REST APIs, and responsive web development. I have experience building reusable UI components, working with CMS platforms, debugging frontend issues, and developing user-focused web applications in agile environments.

I am passionate about front-end engineering, UI/UX improvement, and modern software development practices. I enjoy learning new technologies quickly and continuously improving my technical and problem-solving skills. Alongside frontend development, I am also exploring backend development using Python and Fast API, as well as AI-assisted development workflows.

I am particularly interested in working student and part-time role where I can contribute to real-world projects, collaborate with experienced teams, and continue growing as a software engineer. I value clean code, maintainable architecture, teamwork, and user-centered design.

As I am currently studying in Germany, I am specifically looking for opportunities that are compatible with my academic schedule and student visa regulations. I am highly motivated, flexible, eager to learn, and excited to contribute positively to your team.

I would be very happy to further discuss my background and motivation in an interview. Thank you very much for your time and consideration.

Kind regards,

Nikhil Nath P
